

## NEW HIRE TRAINING PROGRAM FAQ

|                                                    |                                                                                                                                                                                                                                                                                                                           |
|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>What is it?</b>                                 | A blended 3-day onboarding program combining interactive online learning (videos, games, and POS simulators) with hands-on, in-store practice alongside certified store trainers.                                                                                                                                         |
| <b>Why is it important?</b>                        | It sets new team members up for long-term success by building confidence in service standards, menu knowledge, phone order accuracy, and store safety from Day 1.                                                                                                                                                         |
| <b>How are Learner credentials generated?</b>      | Credentials are created when the registration form is completed—directly following orientation (Dallas & Denver) or before the new hire's first day (El Paso & LA). Login details are sent straight to the new hire's email entered on the form.                                                                          |
| <b>What if I don't get my Learner credentials?</b> | Click "Need Learner Credentials? Click here" on the WOW Way! Training login screen to instantly search by name or email and re-send your login info, or register fresh on your market's form.                                                                                                                             |
| <b>What are Trainer credentials?</b>               | A secure 4-digit PIN used by GMs, Shift Runners, and Certified Trainers to unlock training checkpoints, verify hands-on floor experiences, and provide official daily sign-offs.                                                                                                                                          |
| <b>How do I get or register a Trainer PIN?</b>     | Click "Manager / Trainer PIN Registration" on the login screen to register or look up your store's authorized Trainer PIN.                                                                                                                                                                                                |
| <b>How do I report issues?</b>                     | Click "Report an Issue" at the bottom of any screen to submit a ticket directly to the WOW Way support team.                                                                                                                                                                                                              |
| <b>How long do issues take to resolve?</b>         | Resolution time depends on complexity. Always submit your report from the exact page where the issue happened so full details are captured automatically. System updates are published every Thursday in the weekly WOW Way Huddle store email. If more info is needed, our team will reach out to you directly by email. |
